

SAFETY DATA SHEET

GRAVITY 68

According to the REACH etc. (Amendment etc.) (EU Exit) Regulations 2020 No. 1577, as amended. Commission Regulation (EU) 2020/878 of 18 June 2020.

SECTION 1: Identification of the substance/mixture and of the company/undertaking		
1.1. Product identifier		
Product name	GRAVITY 68	
Internal identification	DIN 51524 Part2 (HLP);DENISON HF-0,HF-1,HF-2	
1.2. Relevant identified uses of the	e substance or mixture and uses advised against	
Identified uses	Hydraulic oil.	
1.3. Details of the supplier of the s	safety data sheet	
Supplier	ATAK MADENI YAG PAZ.SAN.VE TIC.AS 10032 Sok. No:13 ÇIGLI/IZMIR TURKEY T: 0232 328 3128 www.atakoil.com info@atakoil.com	
Contact person	Hazal ÖNMAL (Mrs.) - hazalonmal@atakoil.com	
1.4. Emergency telephone numbe	ər	
Emergency telephone	Atak Lubricants: +90 232 3283128	
SECTION 2: Hazards identificatio	n	
2.1. Classification of the substanc	e or mixture	
Classification (SI 2019 No. 720) Physical hazards	Not Classified	
Health hazards	Not Classified	
Environmental hazards	Not Classified	
Environmental hazards	NULCIASSINEU	
Classification (Regulation (EC) No. 1272/2008 CLP).		
2.2. Label elements		
Hazard statements	NC Not Classified	
2.3. Other hazards		
No data available.		
SECTION 3: Composition/information on ingredients		

3.2. Mixtures

HYDROCARBONS, C20-50, SOLVENT DEWAXED HEAVY 60-80% PARAFFINIC, HYDROTREATE(Note L)		
CAS number: 90640-95-2	EC number: 292-617-9	
Classification Not Classified		
LUBRICATING OILS; BASEOIL	- UNSPECIFIED (Note L) 25-40%	
CAS number: 74869-22-0	EC number: 278-012-2	
Classification Not Classified		
Phosphorodithioic acid, O,O-di-	C1-14-alkyl esters, zinc salts <1%	
CAS number: 68649-42-3	EC number: 272-028-3	
Classification Skin Irrit. 2 - H315 Eye Dam. 1 - H318 Aquatic Chronic 2 - H411		
Calcium sulfonates CAS number: 64521-08-0	<1%	
Classification Skin Sens. 1 - H317 Aquatic Chronic 2 - H411		
The full text for all hazard stateme	ents is displayed in Section 16.	
SECTION 4: First aid measures		
4.1. Description of first aid measu	Ires	
Inhalation	Move affected person to fresh air at once. Rinse nose and mouth with water. Get medical attention if any discomfort continues.	
Ingestion	Never give anything by mouth to an unconscious person. Do not induce vomiting. Rinse mouth thoroughly with water. Get medical attention if any discomfort continues.	
Skin contact	Remove affected person from source of contamination. Remove contaminated clothing. Wash skin thoroughly with soap and water. Get medical attention if any discomfort continues.	
Eye contact	Remove affected person from source of contamination. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 15 minutes and get medical attention.	
4.2. Most important symptoms and effects, both acute and delayed		
Inhalation	No specific symptoms known.	
Ingestion	May cause discomfort if swallowed.	
Skin contact	Prolonged skin contact may cause redness and irritation.	
Eye contact	Irritation of eyes and mucous membranes. Irritating to eyes. Symptoms following overexposure may include the following: Redness. Pain.	
4.3. Indication of any immediate medical attention and special treatment needed		
Notes for the doctor	No specific recommendations. If in doubt, get medical attention promptly.	

SECTION 5: Firefighting measures

8.1. Control parameters		
SECTION 8: Exposure controls/Personal protection		
Specific end use(s)	The identified uses for this product are detailed in Section 1.2.	
7.3. Specific end use(s)		
Storage class	Chemical storage.	
Storage precautions	Store in tightly-closed, original container in a dry, cool and well-ventilated place. Keep away from food, drink and animal feeding stuffs.	
7.2. Conditions for safe storage, including any incompatibilities		
Usage precautions	Avoid spilling. Avoid contact with skin and eyes. Do not eat, drink or smoke when using the product. Good personal hygiene procedures should be implemented.	
SECTION 7: Handling and storage 7.1. Precautions for safe handling		
SECTION 7: Handling and stores	·	
6.4. Reference to other sections Reference to other sections	For personal protection, see Section 8. See Section 11 for additional information on health hazards. For waste disposal, see section 13.	
Methods for cleaning up	Stop leak if possible without risk. Absorb in vermiculite, dry sand or earth and place into containers. Flush contaminated area with plenty of water. Avoid the spillage or runoff entering drains, sewers or watercourses.	
6.3. Methods and material for cont		
Environmental precautions	Do not discharge into drains or watercourses or onto the ground. Spillages or uncontrolled discharges into watercourses must be reported immediately to the Environmental Agency or other appropriate regulatory body.	
6.2. Environmental precautions		
Personal precautions	Wear protective clothing as described in Section 8 of this safety data sheet. Avoid contact with eyes and prolonged skin contact.	
6.1. Personal precautions, protecti	ive equipment and emergency procedures	
SECTION 6: Accidental release m	easures	
Special protective equipment for firefighters	Use protective equipment appropriate for surrounding materials.	
Protective actions during firefighting	Avoid breathing fire gases or vapours. Fight fire from safe distance or protected location. Control run-off water by containing and keeping it out of sewers and watercourses.	
5.3. Advice for firefighters		
Specific hazards	Protection against nuisance dust must be used when the airborne concentration exceeds 10 mg/m ³ .	
5.2. Special hazards arising from the substance or mixture		
5.1. Extinguishing media Suitable extinguishing media	The product is not flammable. Use fire-extinguishing media suitable for the surrounding fire.	
5.1 Extinguishing modio		

Occupational exposure limits

No data available.

8.2. Exposure controls

Protective equipment

is possible. The following protection should be worn: Chemical splash goggles or face shield.Hand protectionChemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible.Other skin and body protectionWear appropriate clothing to prevent any possibility of skin contact. Wear apron or protective clothing in case of contact.Hygiene measuresProvide eyewash station. Do not smoke in work area. Wash at the end of each work shift and before eating, smoking and using the toilet. Promptly remove any clothing that becomes contaminated. Use appropriate skin cream to prevent drying of skin. When using do not eat, drink or smoke.		
is possible. The following protection should be worn: Chemical splash goggles or face shield. Hand protection Chemical-resistant, impervious glowes complying with an approved standard should be worn if a risk assessment indicates skin contact is possibility of skin contact. Wear appron protective clothing in case of contact. Hygiene measures Provide eyewash station. Do not smoke in work area. Wash at the end of each work shift and before eating, smoking and using the toilet. Prompty remove any dibing that becomes contaminated. Use appropriate skin cream to prevent drying of skin. When using do not eat, drink or smoke. Respiratory protection No specific recommendations. Respiratory protection may be required if excessive airborne contaminated coccurs. SECTION 9: Physical and chemical properties J. Information on basic physical and chemical properties J. Information on basic physical and chemical properties J. Liquid. Haah point Uiui 0.00 °C Bulk deneity Uiui 0.00 °C	Appropriate engineering controls	
assessment indicates skin contact is possible. Other skin and body protection Wear appropriate dothing to prevent any possibility of skin contact. Wear apron or protective clothing in case of contact. Hyglene measures Provide eyewash station. Do not smoke in work area. Wash at the end of each work shift and before eating, smoking and using the toilet. Promptly remove any clothing that becomes contaminated. Use appropriate skin cream to prevent drying of skin. When using do not eat, drink or smoke. Respiratory protection No specific recommendations. Respiratory protection may be required if excessive airborne contaminated occurs. SECTION 3: Physical and chemical properties Appearance Liquid. Flash point Nin 200 °C Buik density 0.86-0.88 g/cm² @15°C (ASTM D 4052) Viscosity 0.86-0.88 g/cm² @15°C (ASTM D 4052) Viscosit	Eye/face protection	Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. The following protection should be worn: Chemical splash goggles or face shield.
case of contact. Hygiene measures Provide eyewash station. Do not smoke in work area. Wash at the end of each work shift and before eating, smoking and using the loilet. Promptly renove any clothing that becomes contaminated. Use appropriate skin, cream to prevent drying of skin. When using do not eat, drink or smoke. Respiratory protection No specific recommendations. Respiratory protection may be required if excessive airbome contamination occurs. SECTION 9: Physical and chemical properties Information on basic physical arrow chemical properties Appearance Liquid. Flash point Min.200 °C Buik density 0,86-0,88 g/cm² @15°C (ASTM D 4052) Viscosity 66.0-69,00 mm²s @ 40°C Penetration	Hand protection	
eating, smoking and using the toilet. Promptly remove any clothing that becomes contaminated. Use appropriate skin cream to prevent drying of skin. When using do not eat, drink or smoke. Respiratory protection No specific recommendations. Respiratory protection may be required if excessive airborne contaminator occurs. SECTION 9: Physical and chemical properties Iquid. 9.1. Information on basic physical and chemical properties Iquid. Appearance Liquid. Flash point Min. 200 °C Bulk density 0.86-0.88 g/cm² @ 15°C (ASTM D 4052) Viscosity 66.00-69.00 mm²/s @ 40°C Penetration 9.2 9.2. Other information None. SECTION 10: Stability and reactivity There are no known reactivity hazards associated with this product. 10.2. Chemical stability There are no known reactivity hazards associated with this product. 10.2. Chemical stability Stable at normal ambient temperatures. 10.3. Possibility of hazardous reactions No potentially hazardous reactions known. 10.4. Conditions to avoid Avoid excessive heat for prolonged periods of time. 10.5. Incompatible materials No specific material or group of materials is likely to react with the product to produce a hazardous situation. 10.6. Hazardous decomposition Fire creates: Carbon mon	Other skin and body protection	
SECTION 9: Physical and chemical properties 9.1. Information on basic physical and chemical properties Appearance Liquid. Flash point Min. 200 °C Bulk density 0.86-0.88 g/cm² @ 15°C (ASTM D 4052) Viscosity 66.00-69.00 mm?/s @ 40°C Penetration 9.2. Other information Viscosity 0.86-0.88 g/cm² @ 15°C (ASTM D 4052) Viscosity 66.00-69.00 mm?/s @ 40°C Penetration 9.2. Other information Viscosity None. SECTION 10: Stability and reactivity None. SECTION 10: Stability and reactivity There are no known reactivity hazards associated with this product. 10.2. Chemical stability There are no known reactivity hazards associated with this product. 10.2. Chemical stability of hazardous reactions No potentially hazardous reactions known. 10.3. Prossibility of hazardous reactions No opentially hazardous reactions known. 10.4. Conditions to avoid Avoid excessive heat for prolonged periods of time. 10.5. Incompatible material No specific material or group of materials is likely to react with the product to produce a hazardous situation. 10.6. Hazardous decomposition Fire creates: Carbon mo	Hygiene measures	eating, smoking and using the toilet. Promptly remove any clothing that becomes contaminated. Use
9.1. Information on basic physical and chemical properties Appearance Liquid. Filash point Min.200 °C Bulk density 0,86-0,88 g/cm³ @15°C (ASTM D 4052) Viscosity 66,00-69,00 mm³/s @ 40°C Penetration 9.2. Other information Other Information None. SECTION 10: Stability and reactivity 10.1. Reactivity Reactivity There are no known reactivity hazards associated with this product. 10.2. Chemical stability Stable at normal ambient temperatures. 10.3. Possibility of hazardous reactions No potentially hazardous reactions known. 10.4. Conditions to avoid Avoid excessive heat for prolonged periods of time. 10.5. Incompatible materials Materials to avoid 10.5. Incompatible materials No specific material or group of materials is likely to react with the product to produce a hazardous situation. 10.6. Hazardous decomposition products Fire creates: Carbon monoxide (CO). Carbon dioxide (CO2). Products Fire creates: Carbon monoxide (CO). Carbon dioxide (CO2).	Respiratory protection	No specific recommendations. Respiratory protection may be required if excessive airborne contamination occurs.
Appearance Liquid. Flash point Min.200 °C Bulk density 0,86-0,88 g/cm² @15°C (ASTM D 4052) Viscosity 66,00-69,00 mm²/s @ 40°C Penetration	SECTION 9: Physical and chemica	al properties
Flash point Min. 200 °C Buik density 0,86-0,88 g/cm³ @15°C (ASTM D 4052) Viscosity 66,00-69,00 mm³/s @ 40°C Penetration 9.2. Other information None. Other information None. SECTION 10: Stability and reactivity There are no known reactivity hazards associated with this product. 10.1. Reactivity There are no known reactivity hazards associated with this product. 10.2. Chemical stability There are no known reactivity hazards associated with this product. 10.2. Chemical stability Stable at normal ambient temperatures. 10.3. Possibility of hazardous reactions No potentially hazardous reactions known. 10.4. Conditions to avoid No potentially hazardous reactions known. 10.4. Conditions to avoid Avoid excessive heat for prolonged periods of time. 10.5. Incompatible materials No specific material or group of materials is likely to react with the product to produce a hazardous situation. 10.6. Hazardous decomposition Vice reactes: Carbon monoxide (CO). Carbon dioxide (CO2). Products Fire creates: Carbon monoxide (CO). Carbon dioxide (CO2).	9.1. Information on basic physical	and chemical properties
Buik density 0,86-0,88 g/cm² @15°C (ASTM D 4052) Viscosity 66,00-69,00 mm²/s @ 40°C Penetration 9.2. Other information None. SECTION 10: Stability and react// None. SECTION 10: Stability and react/// None. SECTION 10: Stability and react/// There are no known reactivity hazards associated with this product. 10.1. Reactivity There are no known reactivity hazards associated with this product. 10.2. Chemical stability Stable at normal ambient temperatures. 10.3. Possibility of hazardous reactions No potentially hazardous reactions known. 10.4. Conditions to avoid Avoid excessive heat for prolonged periods of time. 10.5. Incompatible materials No specific material or group of materials is likely to react with the product to produce a hazardous situation. 10.6. Hazardous decomposition Fire creates: Carbon monoxide (CO). Carbon dioxide (CO2). 10.8. Hazardous decomposition Fire creates: Carbon monoxide (CO).	Appearance	Liquid.
Viscosity 66,00-69,00 mm²/s @ 40°C Penetration	Flash point	Min.200 °C

Reactivity There are no known reactivity hazards associated with this product. 10.2. Chemical stability Stable at normal ambient temperatures. 10.3. Possibility of hazardous reactions No potentially hazardous reactions known. 10.4. Conditions to avoid No potentially hazardous reactions known. 10.5. Incompatible materials No specific material or group of materials is likely to react with the product to produce a hazardous situation. 10.6. Hazardous decomposition products Fire creates: Carbon monoxide (CO). Carbon dioxide (CO2).	Bulk density	0,86-0,88 g/cm³ @15°C (ASTM D 4052)
9.2. Other information None. SECTION 10: Stability and react/VI Reactivity There are no known reactivity hazards associated with this product. 10.2. Chemical stability Stability There are no known reactivity hazards associated with this product. 10.2. Chemical stability Stability of hazardous reactions Stability Attended Stability Stability of hazardous reactions known. 10.3. Possibility of hazardous reactions No potentially hazardous reactions known. 10.4. Conditions to avoid Conditions to avoid Avoid excessive heat for prolonged periods of time. 10.5. Incompatible materials Materials to avoid No specific material or group of materials is likely to react with the product to produce a hazardous situation. 10.6. Hazardous decomposition Fire creates: Carbon monoxide (CO). Carbon dioxide (CO2).	Viscosity	66,00-69,00 mm²/s @ 40°C
Other information None. SECTION 10: Stability and react/vity Stability and react/vity 10.1. Reactivity There are no known reactivity hazards associated with this product. 10.2. Chemical stability There are no known reactivity hazards associated with this product. 10.2. Chemical stability Stable at normal ambient temperatures. 10.3. Possibility of hazardous reactions No potentially hazardous reactions known. 10.4. Conditions to avoid No potentially hazardous reactions known. 10.4. Conditions to avoid Avoid excessive heat for prolonged periods of time. 10.5. Incompatible materials No specific material or group of materials is likely to react with the product to produce a hazardous situation. 10.6. Hazardous decomposition Fire creates: Carbon monoxide (CO). Carbon dioxide (CO2).	Penetration	
SECTION 10: Stability and reactivity 10.1. Reactivity Reactivity There are no known reactivity hazards associated with this product. 10.2. Chemical stability Stable at normal ambient temperatures. 10.3. Possibility of hazardous reactions Stable at normal ambient temperatures. 10.4. Conditions to avoid No potentially hazardous reactions known. 10.4. Conditions to avoid Avoid excessive heat for prolonged periods of time. 10.5. Incompatible materials Materials to avoid 10.6. Hazardous decomposition Vucts Hazardous decomposition Fire creates: Carbon monoxide (CO). Carbon dioxide (CO2).	9.2. Other information	
10.1. Reactivity There are no known reactivity hazards associated with this product. 10.2. Chemical stability There are no known reactivity hazards associated with this product. 10.2. Chemical stability Stable at normal ambient temperatures. 10.3. Possibility of hazardous reactions Stable at normal ambient temperatures. 10.3. Possibility of hazardous reactions No potentially hazardous reactions known. 10.4. Conditions to avoid No potentially hazardous reactions known. 10.5. Incompatible materials Avoid excessive heat for prolonged periods of time. 10.5. Incompatible materials No specific material or group of materials is likely to react with the product to produce a hazardous situation. 10.6. Hazardous decomposition products Fire creates: Carbon monoxide (CO). Carbon dioxide (CO2).	Other information	None.
Reactivity There are no known reactivity hazards associated with this product. 10.2. Chemical stability Stable at normal ambient temperatures. Stability of hazardous reactions Stable at normal ambient temperatures. 10.3. Possibility of hazardous reactions No potentially hazardous reactions known. 10.4. Conditions to avoid No potentially hazardous reactions known. 10.4. Conditions to avoid Avoid excessive heat for prolonged periods of time. 10.5. Incompatible materials No specific material or group of materials is likely to react with the product to produce a hazardous situation. 10.6. Hazardous decomposition Fire creates: Carbon monoxide (CO). Carbon dioxide (CO2).	SECTION 10: Stability and reactiv	ity
10.2. Chemical stability Stable at normal ambient temperatures. 10.3. Possibility of hazardous reactions Stable at normal ambient temperatures. 10.3. Possibility of hazardous reactions No potentially hazardous reactions known. 10.4. Conditions to avoid No potentially hazardous reactions known. 10.4. Conditions to avoid Avoid excessive heat for prolonged periods of time. 10.5. Incompatible materials No specific material or group of materials is likely to react with the product to produce a hazardous situation. 10.6. Hazardous decomposition products Fire creates: Carbon monoxide (CO). Carbon dioxide (CO2).	10.1. Reactivity	
Stability Stable at normal ambient temperatures. 10.3. Possibility of hazardous reactions tractous reactions known. No potentially hazardous reactions known. 10.4. Conditions to avoid Avoid excessive heat for prolonged periods of time. 10.5. Incompatible materials No specific material or group of materials is likely to react with the product to produce a hazardous situation. 10.6. Hazardous decomposition Fire creates: Carbon monoxide (CO). Carbon dioxide (CO2).	Reactivity	There are no known reactivity hazards associated with this product.
10.3. Possibility of hazardous reactions Possibility of hazardous reactions No potentially hazardous reactions known. 10.4. Conditions to avoid Avoid excessive heat for prolonged periods of time. 10.5. Incompatible materials Avoid excessive heat for prolonged periods of time. 10.5. Incompatible materials No specific material or group of materials is likely to react with the product to produce a hazardous situation. 10.6. Hazardous decomposition products Fire creates: Carbon monoxide (CO). Carbon dioxide (CO2).	10.2. Chemical stability	
Possibility of hazardous reactions No potentially hazardous reactions known. 10.4. Conditions to avoid Avoid excessive heat for prolonged periods of time. 10.5. Incompatible materials Avoid excessive heat for prolonged periods of time. 10.5. Incompatible materials No specific material or group of materials is likely to react with the product to produce a hazardous situation. 10.6. Hazardous decomposition products Fire creates: Carbon monoxide (CO). Carbon dioxide (CO2).	Stability	Stable at normal ambient temperatures.
10.4. Conditions to avoid Avoid excessive heat for prolonged periods of time. 10.5. Incompatible materials Avoid excessive heat for prolonged periods of time. 10.5. Incompatible materials No specific material or group of materials is likely to react with the product to produce a hazardous situation. 10.6. Hazardous decomposition products Fire creates: Carbon monoxide (CO). Carbon dioxide (CO2).	10.3. Possibility of hazardous read	tions
Conditions to avoid Avoid excessive heat for prolonged periods of time. 10.5. Incompatible materials Materials to avoid Materials to avoid No specific material or group of materials is likely to react with the product to produce a hazardous situation. 10.6. Hazardous decomposition products Fire creates: Carbon monoxide (CO). Carbon dioxide (CO2).	Possibility of hazardous reactions	No potentially hazardous reactions known.
10.5. Incompatible materials Materials to avoid No specific material or group of materials is likely to react with the product to produce a hazardous situation. 10.6. Hazardous decomposition products Fire creates: Carbon monoxide (CO). Carbon dioxide (CO2). Products Fire creates: Carbon monoxide (CO). Carbon dioxide (CO2).	10.4. Conditions to avoid	
Materials to avoid No specific material or group of materials is likely to react with the product to produce a hazardous situation. 10.6. SECTION 11: Toxicological information	•	Fire creates: Carbon monoxide (CO). Carbon dioxide (CO2).
11.1. Information on toxicological effects		

Information on hazard classes as defined in Regulation (EC) No 1272/2008

Serious eye damage/irritation

Serious eye damage/irritation	No information available.	
Germ cell mutagenicity Genotoxicity - in vitro	Not available information	
Genotoxicity - in vivo	Not available information	
-		
Carcinogenicity Carcinogenicity	Not available information	
Reproductive toxicity		
Reproductive toxicity - fertility	Not available information	
Reproductive toxicity - development	No information available	
Specific target organ toxicity - sin	gle exposure	
STOT - single exposure	not available information	
Specific target organ toxicity - rep		
STOT - repeated exposure	Not available information	
Inhalation	Gas or vapour in high concentrations may irritate the respiratory system. Symptoms following overexposure may include the following: Coughing.	
Ingestion	May cause discomfort if swallowed.	
Skin contact	Liquid may irritate skin.	
Eye contact	Irritating to eyes.

13.1. Waste treatment methods

Disposal methods

Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority. Environmental Manager must be informed of all major spillages. Avoid the spillage or runoff entering drains, sewers or watercourses.

SECTION 14: Transport information

General

The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, ADR/RID).

14.1. UN number

UN number or ID number

Not applicable.

14.2. UN proper shipping name

Not applicable.

14.3. Transport hazard class(es)

No transport warning sign required.

14.4. Packing group

Not applicable.

14.5. Environmental hazards

Environmentally hazardous substance/marine pollutant No.

14.6. Special precautions for user

Not applicable.

Guidance

14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code

Maritime transport in bulk according to IMO instruments

Transport in bulk according toNot applicable.Annex II of MARPOL 73/78 andthe IBC Code

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Workplace Exposure Limits EH40. CHIP for everyone HSG228. Safety Data Sheets for Substances and Preparations. Approved Classification and Labelling Guide (Sixth edition) L131.

15.2. Chemical safety assessment

No chemical safety assessment has been carried out.

SECTION 16: Other information

Key literature references and sources for data	This SDS is prepared based on the information received from the product raw material.
Revision comments	Revised formulation.
Issued by	Hazal KUBİLAY / Teknology Center Laboratory Manager KIMCERT Certificate Number :KDU01.26.07
Revision date	02/01/2020

Revision	0.1
Supersedes date	26/02/2016
SDS number	20457
Hazard statements in full	H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H411 Toxic to aquatic life with long lasting effects.
